1. Work Progress

Week	Progress				
	November – 2024				
Week 1	 Began brainstorming possible research areas. Discussed ideas such as coral-reef protection, IoT-based deforestation detection, and travel-planning systems. Focused on identifying a project with both innovation and social impact. 				
Week 2	 Continued reviewing different domains and evaluating feasibility. Compared environmental, social, and technical relevance of shortlisted topics. Supervisor guided us to align ideas with sustainability and real-world application areas. 				
Week 3	• Shifted focus toward urban heating problems and the Urban Heat Island (UHI) effect.				
	 Supervisor mentioned a colleague from University of Lincoln (UK) researching this field. 				
	 Learned how AI + IoT + Digital twin simulation can help analyze and mitigate heat retention in cities. 				
Week 4	 Finalized UHI detection and mitigation as our main research topic. Supervisor proposed collaborating with his Lincoln colleague as external supervisor and Ms. Kaushalya Rajapakse as cosupervisor. 				
	• Outlined research objectives and drafted the initial problem statement.				
	Prepared early documentation for proposal submission.				
XX7 1 1	December – 2024				
Week 1	 Began preparing the TAF (Topic Assessment Form) document. Collected background details, objectives, and expected outcomes for inclusion. 				
Week 2	 Held a meeting to plan our research schedule. We decided to meet with supervisors every other week starting from January 2025 for progress reviews. Began early reading on AI-based environmental analysis to prepare for proposal writing. 				
	January – 2025				

Week 1	 Started creating Charter and proposal. Met with the supervisor and co supervisor to obtain the signature for the charter document.
Week 2	Completed creating the proposal presentation
Week 3	Had our physical meeting to present the proposal presentation as trial run
Week 4	 We did the proposal presentation. Submitted proposal report (final) to the CDAP cloud
	February
Week 1	 Conducted a group meeting to discuss the proposal result. With a team meeting discussed how to begin the development.
Week 2	I gathered information on how I can develop my system and faced some difficulties.
Week 3	Discussed the issues with supervisors and identified solutions together
Week 4	 Conducted preliminary research on Urban Heat Island (UHI) phenomena and existing simulation approaches such as ENVI-met, EnergyPlus, and MATLAB Simscape. Explored thermal simulation frameworks and tools. Studied thermal properties of building materials (concrete, glass, tile, insulation). Started preparing metadata parameters like density, specific heat capacity, and thermal conductivity.
	March
Week 1	Showed my findings to supervisors.
Week 2	Began designing simulation data flow.
Week 3	Showed my progress and get feedback on how to improve the design and make the process better
Week 4	 Defined system architecture for simulation component. Continue developing the designing.
	April
Week 1	Prepared PowerPoint slides for Progress Presentation 1.
Week 2	Did the progress presentation 1.
Week 3	• Conducted a group meeting to discuss the progress presentation result.
Week 4	 Integrated GIS data and 3D building model export pipeline from Blender. Tested data format compatibility for MATLAB input (CSV).

May				
Week 1	Began using MATLAB Simulink with Simscape Thermal to design protetyres by ilding thermal model			
	to design prototype building thermal model.			
Week 2	Discussed with supervisor about the thermal model issues and			
	contact engineering student was suggested.Participated in a "How to Write a Research Paper" discussion.			
Week 3	Started frontend design and Configured heat transfer			
	components, temperature sensors, and ambient conditions (temperature, wind).			
Week 4	Developed Node.js backend pipeline to connect the React			
	frontend with MATLAB engine.			
	Configured CSV generation and file transfer via REST API.			
	June			
Week 1	 Continued the updates in design and development of the web app frontend. 			
Week 2	• Implemented React + Three.js 3D visualization tool for model viewing and metadata assignment.			
Week 3	 Added Transform Controls for moving and rotating models interactively. 			
Week 4	Added SunCalc.js integration to calculate sunlight			
	exposure based on latitude, longitude, and time.			
	July			
Week 1	Displayed exposure using heatmap overlay on 3D models.			
	• Designed simulation data export to CSV including parameters: Thickness, Density, Thermal Conductivity, Specific Heat			
	Capacity, Sun Exposure, Temperature, Humidity, and Wind			
Weels 2	Speed.			
Week 2	 Began writing our research paper. Reviewed existing research papers related to our component to 			
	support the writing of our research paper			
Week 3	Sent our written research paper to the supervisor for checking.			
Week 4	 Revised the research paper based on the supervisor's feedback. 			
	August			
Week 1	• The supervisor confirmed our research paper for submission to the ICAC conference.			
Week 2	Started writing the individual final report.			
Wasts 2	Submitted our research paper to the ICAC conference. Used a top of a state of the PD2 and individual.			
Week 3	 Had a team meeting and discussed the PP2 and individual components. 			
	Organized a team meeting to plan the final report.			

Week 4	 Met with the supervisor to obtain the signature for the final report. Completed individual final report and submitted to the CDAP. Final report was sent for proofreading.
	September
Week 1	 Had a team meeting and discussed the PP2 Built MATLAB simulation model to calculate temperature variation using metadata and dynamic weather parameters. Started creating the PP2 slides.
Week 2	 Checked that 90% of the HeatScape app is working correctly. Presented the 90% progress to the panel at PP2
Week 3	 Shared the panel comments with the supervisors Demonstrated how the simulation worked to the supervisors Continued some integration work between the frontend and backend.
Week 4	 Started creating the project website. Looked into deployment strategies for the models
	October
Week 1	 Did validation testing around the campus Added PDF report generation with exposure maps and recommendations to web application.
Week 2	 A research paper status mail was received from ICAC. Attending research discussion.
Week 3	 Deployed system to AWS. Prepared final presentation Created UI/UX Demo video Applied to WSA Competition
Week 4	Presented the final presentation

2. Supervisor Meeting Logs

Date	Platform / Location	Remarks
Nov 21, 2024 (Thu)	Microsoft Teams	Initial meeting after topic selection; discussed TAF preparation and upcoming proposal schedule.
Dec 5, 2024 (Thu)	Microsoft Teams	Reviewed draft TAF; supervisor feedback on objectives and feasibility.
Dec 18, 2024 (Wed)	Microsoft Teams	Progress check on proposal drafting; clarified scope of components.

Dec 19, 2024 (Thu)	Microsoft Teams	Finalized TAF submission and confirmed biweekly meetings from
Jan 2, 2025 (Thu)	Microsoft Teams	January. Discussed proposal structure and responsibilities for Charter document.
Jan 9, 2025 (Thu)	6th Floor, Main Building	Signed Charter; supervisor advised improvements for proposal presentation.
Jan 16, 2025 (Thu)	Microsoft Teams	Reviewed draft proposal slides; minor adjustments recommended.
Jan 23, 2025 (Thu)	6th Floor, Main Building	Trial run of proposal presentation; feedback on flow and clarity.
Jan 30, 2025 (Thu)	Microsoft Teams	Proposal preparation review; confirmed submission readiness.
Feb 6, 2025 (Thu)	6th Floor, Main Building	Discussed proposal results; planned system development schedule.
Feb 13, 2025 (Thu)	Microsoft Teams	Discussed Blender integration and metadata mapping for building models.
Feb 20, 2025 (Thu)	6th Floor, Main Building	Demonstrated early Simulink thermal model. Supervisor recommended using thermal resistance and moist air properties.
Feb 27, 2025 (Thu)	Microsoft Teams	Reviewed MATLAB-React communication pipeline concept.
Mar 6, 2025 (Thu)	6th Floor, Main Building	Progress on React 3D viewer. Supervisor requested adding sunlight exposure simulation.
Mar 13, 2025 (Thu)	Microsoft Teams	Discussed initial prototype issues; planned next testing cycle.
Mar 20, 2025 (Thu)	6th Floor, Main Building	Supervisor reviewed exposure results and advised validation tests; improvement feedback.
Mar 27, 2025 (Thu)	Microsoft Teams	Prepared for Progress Presentation 1; checked slide content.
Apr 3, 2025 (Thu)	6th Floor, Main Building	Conducted mock PP1; feedback on presentation structure.
Apr 10, 2025 (Thu)	Microsoft Teams	Discussed PP1 results and suggested improvement areas.
Apr 17, 2025 (Thu)	6th Floor, Main Building	Planned model upgrades for more accurate results.
Apr 24, 2025 (Thu)	Microsoft Teams	Introduced matlab simscape model from external supervisor for thermal simulation.
May 1, 2025 (Thu)	6th Floor, Main Building	Began using MATLAB Simulink with Simscape Thermal to design prototype building thermal model.
May 8, 2025 (Thu)	Microsoft Teams	Reviewed 3D model design.
May 15, 2025 (Thu)	6th Floor, Main Building	Supervisor checked progress of frontend development.
May 22, 2025 (Thu)	Microsoft Teams	Discussed integration of backend model with frontend.
May 29, 2025 (Thu)	6th Floor, Main Building	Finalized csv generation format for simulation.
Jun 5, 2025 (Thu)	Microsoft Teams	Supervisor reviewed backend and simulation model.
Jun 12, 2025 (Thu)	6th Floor, Main Building	Discussed research paper draft and experiment validation.
Jun 19, 2025 (Thu)	Microsoft Teams	Feedback on paper structure and data representation.
Jun 26, 2025 (Thu)	6th Floor, Main Building	Reviewed experiment results; finalized paper content.
Jul 10, 2025 (Thu)	6th Floor, Main Building	Supervisor checked final draft before submission.
Jul 24, 2025 (Thu)	6th Floor, Main Building	Reviewed ICAC submission and progress on final report.
Aug 7, 2025 (Thu)	6th Floor, Main Building	Feedback on final report writing and PP2 preparation.
Aug 21, 2025 (Thu)	6th Floor, Main Building	Reviewed final submission; confirmed proofreading stage.
Aug 21, 2025 (Thu)	Microsoft Teams	Final sync-up before submission; confirmed deadlines.
Sep 4, 2025 (Thu)	Microsoft Teams	Discussed PP2 presentation slides and algorithm demonstration.
Sep 4, 2025 (Thu)	6th Floor, Main Building	Conducted PP2 dry run and gathered feedback.
Sep 18, 2025 (Thu)	Microsoft Teams	Reviewed panel feedback and integration progress.

Oct 16, 2025 (Thu)	Microsoft Teams	Reviewed integrated system. Supervisor suggested adding report generation and user-friendly visualization. Final presentation review; validation testing and WSA submission updates.
--------------------	-----------------	---
